NHD-140

Home Studio Desk

User's Manual

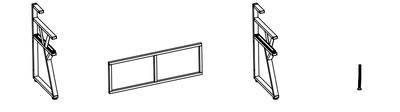

Introduction

The NHD-140 Home Studio Desk is designed specifically for modern musicians creating music at home.

It features a high-strength, lightweight dual-layer structure that is stable, durable, and easy to transport. Unlike basic home studio desks, the central MIDI keyboard tray uses an extended sliding design. When not in use, it can be fully pushed back to the innermost part of the desk, instantly freeing up legroom for comfortable, relaxed seating even during long sessions.The MIDI keyboard tray is supported by an independent structure, keeping the desk and keyboard steady even with heavy keyboards or aggressive playing-no wobbling or instability. The front edge of the desktop has an ergonomic beveled cut to reduce forearm strain effectively.

Every detail is engineered to help you stay focused and comfortable during long hours of mixing and music production.
